

Purging the Carbonator

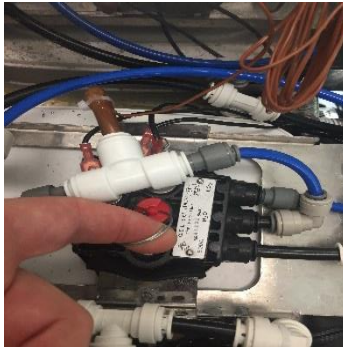

1. Turn off the machine and turn off the CO2.

1

2. Open up the lid of machine and notice where the carbonator is located. You will need to lift up on the ring at the top of carbonator and let all the air out until you see water spraying out of the tank.

2

3. Turn on machine and turn on CO2. Dispense water from the CO2 spigot for one liter and dispose of water. Continue to dispense until you notice water is sparkling.
